<projects>

Samwise - PHP/Laravel, Vue.js

Samwise is a storefront management system. Currently in production it has already processed nearly 2,000 orders collectively worth over \$400,000. Built on Laravel and Vue.js, it manages all aspects of a modern business such as billing (Stripe API), Shipping (EasyPost API), and realtime searching (ElasticSearch Engine).

Save for Good - Ruby/Rails, React.js/Redux

<http://www.save-for-good.com>

Save for Good is a single page application developed to allow the funding of loans to entrepreneurs around the world, through the non-profit Maple Microdevelopment. Built on the most modern web development patterns it incorporates React and Redux for it's front end and Ruby on Rails to support the back end.

A-Maze - JS ES6, React.js/Redux

<https://a-maze.tjt.codes>

A study in maze algorithms, "A-Maze" is both a maze generation and solution algorithm visualizer. Incorporating a hand-rolled graph to canvas rendering engine, React/Redux controls, and a number of classic maze algorithms. It lets anyone see the many different methods to programmatically develop or solve mazes.
