\<projects\>

Samwise - PHP/Laravel, Vue.js
<a href="samwise.tjt.codes" />

Samwise is a storefront management system built Laravel and Vue.js. It is capable of managing medium to large sized inventories and invoices quickly and effeciantly. It manages all aspects of a modern buisness such as billing (through Stripe), Shipping (through EasyPost), and searching (through ElasticSearch).

Save for Good - Ruby/Rails, React.js/Redux
<a href="save-for-good.com" />

Save for Good is a platform developed to allow the funding of microloans to entreprenuers who do not have access to traditional loan services. Built on the most modern web development patterns it incorperates React and Redux for it's front end and Ruby on Rails to support the back end.

A-Maze - JS ES6, React.js/Redux
<a href="a-maze.tjt.codes" />

A study in maze algorithms, "A-Maze" is both a maze generation and solution algorithm visualizer. Incorporating a hand-rolled graph to canvas renderer, React/Redux controls, and a number of classic maze algoritms it lets anyone see the many differant methods to programatically develop mazes.
